

How To: Figure out your science GPA*

1. Go to <https://gpacalculator.net/>
2. Click on “college calculator”
3. Add all of your science and math grades and credits to the cells (UF does not use +/- in our calculations)
Science and math include all biologies, physics, chemistries, algebras, statistics, psychology, food science, anatomy/physiology, animal science and veterinary medicine courses

How To: Figure out your last 45 GPA*

1. Go to <https://gpacalculator.net/>
2. Click on “college calculator”
3. Start with your most recent classes and go backward to the semester that has your most recent 45th credit. You will include the grades from that entire semester.
4. Your last 45 GPA may be more than 45 credits. (UF does not use +/- in our calculations)

How To: Figure out your overall GPA*

1. Go to <https://gpacalculator.net/>
2. Click on “college calculator”
3. Add every course you’ve ever taken from every institution. (UF does not use +/- in our calculations)

UF does not have grade forgiveness or grade expiration. If the grade is on your transcript, it is included in your GPA.

*Your calculations will not be exact. This is an opportunity to get an idea of your GPAs.

For the last decade, the current averages for admitted students have been higher than a 3.5.
