

Hello Students & Alumni,

This is your next edition of the UF CVM Career Job Postings sent on the first and third Friday of every month. Unless an employer re-submits their position, these postings only appear in one email, so make sure to read each email to stay up-to-date on available positions!

Tip of the email: DVM Students and Alumni up to one year post-graduation can still schedule Career Services Appointments! Book your Zoom meeting now through [this link](#) to discuss your career plan, review your resume/CV, or strategize for your externship search.

Best,
UF CVM Careers

FULL TIME POST-GRAD

CDC Epidemiology Fellowship - Organization Centers for Disease Control and Prevention (CDC) Reference Code CDC-DFWED-2020-0142

How to Apply: A complete application consists of: An application, Transcripts – Click here for detailed information about acceptable transcripts, A current resume/CV, including academic history, employment history, relevant experiences, and publication list, One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted. All documents must be in English or include an official English translation. If you have questions, send an email to

ORISE.CDC.NCEZID@orau.org. Please include the reference code for this opportunity in your email. Application Deadline: 7/31/2020 3:00:00 PM Eastern Time Zone. Description

*Applications will be reviewed on a rolling-basis. A research opportunity is currently available with the Outbreak Response and Prevention Branch (ORPB), within the Division of Foodborne, Waterborne, and Environmental Diseases (DFWED) in the National Center for Emerging and Zoonotic Infectious Diseases (NCEZID) at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia CDC's Outbreak Response and Prevention Branch (ORPB) collaborates with epidemiologists, laboratorians, and other public health officials who investigate clusters of foodborne, waterborne, zoonotic, and other enteric (gastrointestinal) illnesses in the United States. ORPB works to ensure rapid and coordinated surveillance, detection, and response to multistate outbreaks caused by Escherichia coli, Salmonella, and Listeria. Focus areas for the branch include: (1) coordinating the national network of public health officials who investigate foodborne, waterborne, zoonotic, and other enteric disease outbreaks; (2) providing outbreak assistance to state and local health departments and other groups at CDC who investigate multistate enteric disease outbreaks; (3) develop, implement, and evaluate tools and strategies for the prevention and control of zoonotic enteric disease outbreaks; (4) communicating risk to the public and other stakeholders during ongoing outbreaks and create educational materials to prevent enteric illnesses; and (5) collaborating closely with laboratory colleagues to use whole genome sequencing and other advanced laboratory techniques in enteric pathogen outbreak investigations. The selected participant will train in the Enteric Zoonoses Activity (EZA) and focus on investigating and preventing outbreaks of enteric illness associated with animal contact. Specific activities may include: contributing to the development of data collection tools

for management and analysis of information collected during outbreaks; participating in the development of educational materials used by stakeholders during outbreak investigations; analyzing current outbreak response activities to identify improvements collaborating with partners from FDA/USDA and other organizations to harmonize public messaging on enteric zoonotic outbreak prevention. This project offers an opportunity to be involved as a core member of a multi-disciplinary team focusing on outbreak response and prevention activities, a primary component of CDC's mission. The project offers advanced experiential learning opportunities that should complement academic study in public health and related fields. The participant will have opportunities to enhance quantitative and qualitative reasoning, critical thinking, problem solving, communication, and teamwork skills. Anticipated Appointment Start Date: August 3, 2020; start date is flexible This program, administered by ORAU through its contract with the U.S. Department of Energy to manage the Oak Ridge Institute for Science and Education, was established through an interagency agreement between DOE and CDC. The initial appointment can be up to one year, but may be renewed upon recommendation of CDC contingent on the availability of funds. The participant will receive a monthly stipend commensurate with educational level and experience. Proof of health insurance is required for participation in this program. The appointment is full-time at CDC in the Atlanta, Georgia, area. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment related benefits. The qualified candidate should have received a master's or doctoral degree in one of the relevant fields, or be currently pursuing one of the degrees and will reach completion by August 2020. Degree must have been received within five years of the appointment start date. Preferred skills: Experience with data importation, manipulation, and analysis, Experience with Excel and Power Point, Strong quantitative skills, which may include proficiency in SAS, R, Epi-Info, online data management and integration platforms such as RedCap or SEDRIC and other relational database management systems, Ability to interpret and summarize scientific data, Excellent written and verbal communication and organizational skills. Eligibility Requirements: Citizenship: LPR or U.S. Citizen, Degree: Master's Degree or Doctoral Degree received within the last 60 months or anticipated to be received by 8/31/2020 11:59:00 PM. Discipline(s): Communications and Graphics Design (1 ☐), Life Health and Medical Sciences (8 ☐), Mathematics and Statistics (2 ☐). **If you have questions, send an email to ORISE.CDC.NCEZID@orau.org**

DVM FULL TIME

Director of the Division of Laboratory Animal Services – Augusta, GA; Augusta University

The Division of Laboratory Animal Services (DLAS) at Augusta University in Augusta, Georgia, is seeking an experienced, compassionate and collaborative leader for the position of Director of Laboratory Animal Services to manage a multi-site complex for animal care and use.

Home to four campuses in Augusta and various satellite locations, Augusta University, one of 26 institutions within the University System of Georgia, is at the forefront of groundbreaking research focused on improving and enriching the human experience. The Division of Laboratory Animal Services (DLAS) is the centralized service organization responsible for the procurement, conditioning, routine care and veterinary oversight of animals used in research and teaching. DLAS also maintains a diagnostic laboratory equipped to perform hematology, bacteriology and parasitology testing in support of research and teaching programs. DLAS professional veterinary staff includes an assistant director and a clinical veterinarian who is also a specialist in laboratory animal medicine; and trained Veterinary Technicians who, under the direction of the veterinarians and other scientists, are available to carry out animal treatments, technical procedures and assist in surgery. The Director will ensure collaboration and integration of laboratory animal resources and support research effort through direction over the Animal Care and Use Program. The Director will serve as the Attending Veterinarian (AV) and as such, will assume the leadership role for implementation of the Animal Care and Use Program and have sufficient authority, as provided by the institution, to treat an animal and institute appropriate measures to relieve pain or distress, including euthanasia. The Director is expected to work collaboratively with the Institutional Official (IO), the Institutional Animal Care and Use Committee (IACUC), research staff and internal and external regulatory agencies. The Director is responsible for recognizing and maintaining adequate resources to manage the overall program of veterinary care and will supervise the Clinical Veterinary staff to provide clinical care, health surveillance and program oversight. The DLAS Director reports to the Associate Vice President for Basic Science Research at AU. Since the Director also serves as the Attending Veterinarian, there is also a dotted line reporting relationship between the Attending Veterinarian and the IO. This matrix reporting structure is in place to insure that animal program needs can be clearly communicated to the IO in accordance with AAALAC accreditation guidelines. While all applications will be reviewed, the ideal candidate will: Hold a veterinary license in the USA, Be eligible and willing to obtain a Georgia State Veterinary License, Have had five or more years' experience (fiscal and administrative) managing a complex animal care and use program, Have strong and demonstrable interpersonal skills, Additional consideration will be given to candidates with a record of accomplishment in residency or equivalent experience in clinical laboratory animal medicine,

experience in medicine and research use of experimental animals, surgery and management of rodents and other species of lab animals. With an emphasis on customer service and a providing high quality animal care and research support in a timely manner while being courteous, professional and responsive to researcher customers, the Director must be highly collaborative and prioritize the welfare of animals and the staff that care for them, while also having the skills and experience to raise external sources of funding in a time of state budget constraints. Vast experience training staff on best practices and analytics and root cause analysis are all high priorities. Facility operation and facility maintenance oversight experience is critical. The Director will be disciplined about implementing critical protocol to maintain compliance during a time of animal research growth and findings. This is an opportunity for an innovative and organized leader to collaborate with an impressive research staff that have the capacity and influence to develop critical medical findings for the future of medicine. Additional information about the position, including a leadership profile, can be found at www.wittkiewer.com. DLAS maintains a centralized animal care program with administrative management of six on-campus and one off-campus animal facilities. The animal facility and use program is accredited by the Association for Assessment and Accreditation of Laboratory Animal Care International (AAALAC), a Registered Research Facility with the United States Department of Agriculture (USDA No. 57-R-0002) and has an Office of Laboratory Animal Welfare Assurance number. All nominations and applications shall be confidential. Augusta University and AU Health System are Equal Opportunity/Affirmative Action employers. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, ethnicity, age, genetic information, disability, gender identity, sexual orientation or protected veteran status. We seek and encourage applicants from underrepresented categories. Augusta University is an AA/EEO/Equal Access/ADA Employer. **Application materials should be submitted to the candidate portal. Nominations and inquiries can be directed to WittKiewer consultants Mercedes Chacon Vance and Kim Brettschneider at AugustaDirLAS@wittkiewer.com**

City of Salisbury- Veterinarian – Salisbury, MD; Salisbury Zoo

Salary \$61,958-\$67,065 Excellent Range of Benefits. City of Salisbury Overview: Situated between the Chesapeake Bay and Atlantic Ocean is the capital of the Eastern Shore, Salisbury, Maryland. With a growing population of over 32,000, Salisbury has become home to a very diverse community of people. Whether it is for the vibrant economic opportunity, quality public education, world-class healthcare, reinvigorated environmental stewardship, or globally known corporations, people are coming to be a part of this ever-changing town. Zoo Overview: The Salisbury Zoo is a nationally recognized free municipal zoo with a strong emphasis on fostering enthusiasm for wildlife and inspiring conservation of our natural world. With almost 300,000 visitors every year, the Salisbury Zoo is a beloved and regional attraction on the Eastern Shore of Maryland. The Zoo's 12 acres are located at the heart of our City and is the center of City Park, a 113-acre park, along the Wicomico River. As a community resource, the Salisbury Zoo has been vital to the education of our regional schools. The Salisbury Zoo is positioned for growth and new opportunities as it heads towards its 70th year. Position Profile: The Salisbury Zoo seeks an experienced Veterinarian to join our team and lead our medical program. The Veterinarian is responsible for providing and overseeing quality health and medical services to maximize care for the entire animal collection. This includes, but is not limited to, the diagnosis and treatment of illness and injuries, maintaining a preventive medical program, upholding quarantine protocols, providing care for animals recovering from illness or injury, performing post-mortem examinations, operating a full-service clinic, and ensuring compliance with all appropriate regulatory agencies. Essential Duties: Provide comprehensive medical care to the entire animal collection. This includes being familiar with the biology, husbandry, and medical requirements for species in the collection. Provide diagnostic, medical, and surgical care following all health protocols, rules, regulations, policies, and procedures. Evaluate current preventive medicine program, update, modify and implement as required to maintain a program

that includes but is not limited to class and/or order specific protocols. Implement vaccination protocols. Maintain, update, and modify all medical programs as needed to meet AZA, AAZV, AVMA and USDA standards. Perform and supervise clinical diagnostic and laboratory procedures; analyze and interpret findings. Evaluate current diets, adjusting as needed to create appropriate diets to promote health and well-being. Clinical pathology: interpret results of testing in the following areas: hematology, clinical chemistry, parasitology, microbiology, cytology, urinalysis, and serology. Evaluate new procedures and techniques for incorporation into the clinical pathology routine. Pathology: ensure all Zoo animals receive a complete post-mortem examination to include a complete necropsy and histopathology examination where appropriate. Ensure accurate necropsy and pathology records are maintained. Train and be familiar with all chemical immobilization equipment in the Zoo hospital. Participate in training of other Zoo staff in emergency chemical immobilization procedures. Administrative Duties: In coordination with the Director of the Zoo, manage services of consulting and back-up veterinarians. Establish a standardized training program of technician(s), hospital interns, and other staff members assigned tasks related to animal health care. Efficiently communicate with staff of other institutions and related regulatory agencies. Act as liaison to the USDA, DEA and other appropriate state and federal agencies. Ensure compliance with local, state, and federal laws and regulations as related to the animal collection and veterinary practices. Ensure medical records are up-to-date and maintained to AZA, AAZV and USDA standards. Requirements: Doctor of Veterinary Medicine (DVM), Veterinary Medical Doctor (VMD), or equivalent degree from an AVMA accredited college of veterinary medicine or equivalent. Possess (or obtain) a State of Maryland Veterinary license. Possess (or obtain) a Federal DEA license and the controlled substances registration needed in Maryland. Possess (or obtain) a certificate of Veterinary Accreditation by the USDA (level II) to write health certificates. Minimum of one – two years of experience with exotics, preferably with zoo animals. Ability to communicate effectively verbally and in writing. Ability to take control and think clearly in unforeseen and emergency situations. Must be able to function in a team environment, as well as, perform tasks with minimal supervision. Must be proficient in the use of computers including MS Office Suite (Word, Outlook, Excel and PowerPoint). Preferred Education and Experience: Working knowledge of all aspects of animal health care of exotic and zoo animals. Working knowledge of all applicable wildlife regulations and laws. Knowledge of MedARKs, ZIMS with medical and/or other medical record keeping systems. Knowledge of applicable AZA, AAZV, AVMA, and USDA guidelines and regulations. Knowledge of regulatory and licensing agencies that affect the operation of the zoo and zoo hospital. Further Comments: The Salisbury Zoo is an organization who's committed to enhancing the quality of life by providing a friendly, relaxing environment where educational and recreational opportunities come together through participation and interaction. This full-time position offers competitive pay and a generous benefits package. Closing Date: First Consideration by Tuesday, June 23, 2020 **APPLY: online at www.salisbury.md/apply upload CV/Resume, cover letter and copy of driving record into the online application.
